WORKING PAPERS

“I Can Make My Own Schedule”: A Mixed Methods Analysis of the Impact of the Health Profession Opportunity Grant Program on Workplace Flexibility (with Andrea Hetling, Grace Maruska, and Victoria Coty) **Revise & Resubmit**

Policymakers are increasingly focused on promoting job quality as a means to enhance financial stability and well-being through employment. Thus, evaluations of public workforce interventions are adding employment outcome measures that go beyond wages in order to assess job quality more broadly. This study employs a mixed methods design to understand what aspects of job quality, beyond wages and benefits, are valued by most participants of a federally-funded sectoral job training program and then assess the impact of the program using these grounded insights. We use secondary data from a randomized control trial of the Health Profession Opportunity Grant (HPOG) for our analyses. Qualitative thematic coding reveals participants' preference for scheduling choice as a strategy to achieve work-life balance. Statistical models demonstrate that the program facilitates access to jobs with greater workplace flexibility. Heterogeneity analysis reveals differential impacts by ethnicity and education level, and notable positive results for individuals with children, a group more likely to value and benefit from flexibility. Policy implications of these findings are especially important in the context of past HPOG evaluations that indicate no program impact on wages, a more traditional program measure of job quality.

Are low-skilled immigration and coresidence substitutes? Evidence from Secure Communities

This paper studies the impact of Secure Communities (SC), an immigration enforcement program that removed a large number of non-citizens, on the living arrangements of elderly U.S.-born individuals. Exploiting spatial and temporal variation in the implementation of SC, I estimate a difference-in-differences model with location and time fixed effects. The findings indicate that SC increased the likelihood of coresidence among U.S.-born elderly. Additionally, there is suggestive evidence indicating an increase in coresidence of the elderly with unemployed individuals following SC. Empirical tests suggest that the increased price of household services due to the reduction of immigrants' labor supply is the key mechanism generating these effects.

Immigration Enforcement and Health Insurance: Evidence from Secure Communities (*with Marina Lovchikova*)

- Program Chair Award for the Best Health Equity Paper at the 13th American Society of Health Economists Conference (ASHEcon 2024)

This paper examines whether the implementation of Secure Communities (SC), an immigration enforcement program that removed a large number of non-citizens, affected health insurance enrollment of Hispanic U.S. citizens who themselves are not subject to the policy. Exploiting spatial and temporal variation in the implementation of SC, we estimate triple-difference and event study models. Our findings reveal that SC significantly reduced Medicaid enrollment by 1.9 percentage points and increased the uninsured rate by 2.6 percentage points among likely eligible Hispanic citizens, with no significant effects observed for non-Hispanics. These effects are pronounced in the initial two years post-implementation, suggesting a temporary but substantial “chilling effect.” Exploring the mechanism, we find that the effect of SC is driven by information transmission within families and communities, consistent with literature on network effects. For policy goals of closing a gap in health insurance coverage and take-up of social safety net programs among Hispanic, our results highlight a crucial role of communities in mitigating the unintended effects of anti-immigrant policies.

Households Spatial Sorting Impacts of the Housing and Financial Crisis (*RDC project with John Anderson and Kyle Kopplin*)

Uses restricted micro-data in Census Research Data Center to explore Tiebout-style sorting and neighborhood demographic homogeneity after the Great Recession.

Automation, Career Trajectory, and Education (*with Marina Lovchikova*)

GRADUATE RESEARCH EXPERIENCE

- Research Assistant for Dr. Anderson Fall 2019-Spring 2022
University of Nebraska-Lincoln
- Research Assistant at Bureau of Business Research Fall 2018-Spring 2019
University of Nebraska-Lincoln

PREVIOUS EMPLOYMENT

- Co-adjutant Researcher 11/2024-12/2024
Heldrich Center for Workforce Development at Rutgers University
- Postdoctoral Fellow 07/2023-11/2024
Heldrich Center for Workforce Development at Rutgers University
- Research Consultant 01/2017-08/2017
Ministry of Economic Development of Tajikistan
- Business Development Specialist 2016
RSM International, Dushanbe, Tajikistan
- Economist/Intern 2015
Devtech SYstems Inc, Arlington, VA

TEACHING EXPERIENCE

- Teaching Instructor (3 courses, full responsibility) 2020-2022
Principle of Microeconomics
- Teaching Instructor (full responsibility) 2021
Principle of Macroeconomics
- Teaching Assistant 2017-2021
Principle of Macroeconomics, Principle of Microeconomics, Econometrics I (Ph.D.)

SCHOLARSHIPS AND AWARDS

- Top viewed article published by the Contemporary Economic Policy in 2023
- Program Chair Award for the best abstract in the Health Equity program area, **ASHEcon** 2024
- McConnell Dissertation Fellowship, **UNL** 2022-2023
- Ogle Research Fellowship, **UNL** 2017-2023
- Fulbright Scholarship 2014-2016
- Edmund Muskie Fellowship 2015

PRESENTATIONS

- Association for Public Policy Analysis and Management 2024
- American Society of Health Economists 2024
- 3rd Annual Bloustein Research Day, Rutgers University 2024
- Midwest Economic Association 2023
- Midwest Economic Association 2022
- 8th Annual Conference, Leibniz Institute for East and Southeastern European Studies (IOS) 2021
- Western Economic Association International 2021
- Microeconomics Working Group (UNL) 2019, 2020, 2021, 2022

SERVICE

Refereeing: World Development Journal, Comparative Economics Studies
Economics Department Undergraduate Committee at UNL
– Graduate Student Representative (2021-2022)
Economics Graduate Student Association at UNL
– President (2020-2021), Vice-President (2019-2020)
Fulbright Student Association at Texas A&M University
– Vice-President (2015-2016)

OTHER

- Security Clearance: U.S. Census Special Sworn Status
- Programming: STATA, R-program, SQL, SAS, Tableau, LaTeX, JMP, MS Office
